

Many people suffer needlessly from injuries due to a car crash, when there is a solution right here in Tulare...

I was having terrible headaches, all the time. My medical doctor had prescribed all sorts of different medication, with no relief. Having these headaches was really starting to affect me in many ways, and since I run a day-care, it's very important that I'm not a grouch! My M.D. finally found a medication that reduced my headaches, but I had to take it all the time, and who knows what that was doing to my stomach (besides, it cost \$160.00 for just a few pills!).

A few friends told me that I should try Dr. Mitchell, because they had experienced a lot of relief. Well, finally I did. Now, I don't need the medicine AT ALL! My headaches are gone, and now I see Dr. Mitchell periodically to keep it that way. Thanks to Dr. Mitchell, my headache medication (and the headaches) are history!

Sincerely,

Shirley Bradley
